

PG ORTHODONTIC DIPLOMA AND CERTIFICATE IN PASSIVE SELF LIGATION THERAPIES

Oct 2023 to March 2024 - Ho Chi Minh, Vietnam.

Launch your career in a new and exciting direction with this advanced orthodontic programme. Whether you are a general dentist wanting to start practicing orthodontics or an orthodontist looking into Passive Self Ligation systems in depth you will get a great value from this programme.

This program has been designed to be comprehensive, flexible and most importantly enjoyable, and will utilise the Damon system through out the programme exclusively.

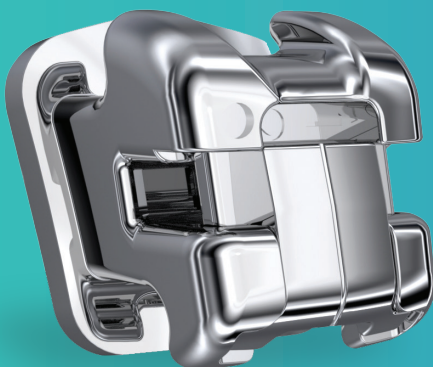

The structure of it is so unique to accommodate the challenging and busy life of all clinicians. This programme will consist of 4 face to face learning modules and 4 online study clubs over 12 months, and it will also contain recorded online learning materials. The face to face modules will be every other month in Ho Chi Minh, and the study clubs will take place in the alternating months.

The 4 learning modules will be each 2 days face to face spread over 12 months, while the study clubs will be a 3 Hrs online meeting to discuss ongoing cases of the students. There will be a recorded online materials to cover the basic of orthodontic examination, diagnosis and record taking, these materials will be available to view 2 weeks before the first module, so that we all understand each other and achieve the same standards.

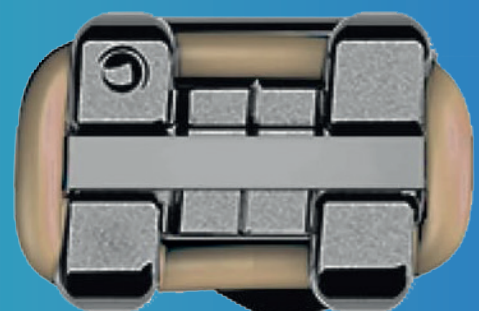

What Is Passive Self ligation

- › These are a class of orthodontic appliances “Brackets” that have sophisticated sliding mechanism that retain the wire inside the bracket without the need for elastics ligatures.

The Damon System is the most advanced Passive Self-ligation system in the world.

Vs

Why Passive Self Ligation

Orthodontics has changed dramatically in the last 10 years; new materials, and new technologies have delivered better results for patients and clinician.

However, it is a human nature that we want more and more, orthodontists wants to achieve the most beautiful smile possible for their patients, and patients want this done as quickly as possible. The science is clear, the forces delivered by PSL systems result in more favourable result in a minimally invasive way through bone remodelling. These system allow us to treat cases that 10 years ago were needing major orthognathic surgery. It might be enough to say that Passive self life ligating orthodontic systems like the Damon system are used by the best orthodontists in the world.

Diploma Or Certificate

This programme is designed to offer doctors 2 levels of achievements depending on your preference and career progression desires. The first Level is a Post Graduate Diploma, where you have to attend all five modules, submit 6 clinical cases and sit an MCQs exam. Alternatively you can be awarded a certificate for attending some or all of the modules without submitting the clinical cases.

Post Graduate Diploma	Post Graduate Certificate
Attend All the Modules	Attend all of the modules
Submit 6 completed cases within 24 months	Online MCQs assessment
Sit A Final Assessment exam	

Dates and Locations

Dates	Ho Chi Minh	Online Study Clubs
October 2023	Module 1	
November 2023		Study Club 1
December 2023	Module 2	
January 2024		Study Club 2
February 2024	Module 3	
March 2024		Study Club 3
April 2024	Module 4	
May 2024		Study Club 4

Module 1: Treatment planning in Passive Self-Ligation Orthodontics 1

Aims

Enable students to conduct treatment planning of CI I and CI II malocclusions after providing comprehensive understanding of the science and available evidence.

Learning Objectives

- Learn what is Passive Self-ligation Systems
- Learn and critique the science behind PSL systems
- learn to treatment plan CI I and CI II malocclusion cases
- learn the required bio mechanics

Practical component

- Bracket placement hands on session
- system essential
- applied bio mechanics 1

Module 2: Treatment planning in Passive Self-Ligation Orthodontics 2

Aims

Enable students to conduct treatment planning of CI III and Bi Max malocclusions.

Learning Objectives

- reviewing objectives learned in module 2
- learn to treatment plan CI III and Bi max malocclusion cases
- learn the science and applications of temporary anchorage devices TAD

Practical component

- TADs placement hands on session
- Applied bio mechanics 2

Module 3: Treatment planning in Passive Self-Ligation Orthodontics 3

Aims

Enable students to conduct treatment planning of vertical discrepancy malocclusions.

Learning Objectives

- reviewing objectives learned in module 2 and 3
- learn to treatment open bite malocclusion cases
- learn to treatment plan gummy smile cases
- learn the science and applications soft tissue recontouring using diode laser

Practical component

- Soft tissue laser hands on session
- Applied bio mechanics 3

Module 4: Treatment planning in Passive Self-Ligation Orthodontics 4

Aims

Enable students to conduct treatment planning of malocclusion cases within multi disciplinary settings

Learning Objectives

- learn to treatment plan space creation for dental implant cases
- learn to treatment plan cases with compromised periodontal support
- Learn digital smile design for post orthodontic restorative treatment

Practical component

- Digital Smile Design hands on session

Meet the Instructors

Dr. Borgan received his dental degree from the University of Jordan in 1994, which was shortly followed by a master of orthodontics from Cairo university and a fellowship from the Royal College of Surgeons in UK. Dr. Borgan moved with his family in 2015 to Cambridge - UK, where he founded The Borgan International Academy. Dr. Borgan is a key opinion leader in the region of EMEAI (Europe, Middle East, Africa & India) forOrmco.

Dr. Bader Borgan

BDS, Msc, MOrth RSC Ed
Specialist Orthodontist

Dr. Borgan loves to share his passion towards creating beautiful smiles and faces, he believes that using the most advanced technology in diagnosis and treatment can produce beautiful smiles without removing teeth or major surgeries. Dr. Borgan carries various workshops and lectures worldwide in the field of self-ligation a, and for more than 8 years, he has been trying different ways and protocols for treatments with Damon & Insignia, until he created his own philosophy using both systems. and today he will be sharing with you some of his personal terms: Borgano-dontics, Maxillo-dontics, Mid-face oriented treatment and Root oriented orthodontics.

Dr. Ali Rami Sammarraie

BDS, MFD RCSI, MDPH
Dentist with Special interest
in Orthodontist

Dr. Ali is the education director of Borgan Orthodontic Academy and he is a practicing dentist in London, united kingdom . He has a special interest in Orthodontics and has been involved in the orthodontic education for many years. He achieved his BDS degree in 2004, the membership of the royal college of surgeon in 2006. After practicing for a while he joined a Master's Programme at the university of Sheffield and graduate in 2010 after submitting his thesis on dental education in the clinical settings.

Dr. Ali is passionate about systems in the orthodontic practice and optimising work flow for ultimate efficiency. He is also heavily involved in advanced digital technologies from CBCT to 3rd Printers, which are his new pet project. Dr. Ali will be the doctors' contact person during the programme when they need help with their cases.

Registration and Fees

Doctors interested in joining the programme and have any questions can email us.
You can also follow us on social media for updates and fun contents.
